Summary

I met computers when I was 9 years old and I loved them because they were faster than Atari, and they were 3D. Forced myself to learn. Didn't mind that I didn't have a diploma because they didn't teach that kind of stuff in school back then. I decided to improve myself instead of going to school and I have no regrets. Currently, Have enough software knowledge for myself, I do not have any trouble using hardware and software. Apart from computers, interested in 3D printers and CNC machines. Take courses in order to become familiar with artificial intelligence issues and try to apply them as much as I can. Already have experiences from IT and AI field is very promising. It would be great if I combine them in to IT field so I can solve problems very efficient and accurate.

Experience

IT Support Technician

Konveyor A.S.

Sep 2015 - Jun 2021 (5 years 10 months)

- Maintenance of IT products and installation.
- Managing IT inventory
